CCP Module 3: Cloud Technology Lab

This course module presents participants with a series of exercises and problems designed to test their ability to apply their knowledge of topics covered previously in course modules 1 and 2. Completing this lab will help highlight areas that require further attention, and will further prove hands-on proficiency in cloud computing concepts, technologies, and practices as they are applied and combined to solve real-world problems.

As a hands-on lab, this course provides a set of detailed exercises. Both individual and group exercises are provided that require participants to solve a number of inter-related problems, with the ultimate goal of assessing, measuring and planning for the deployment of cloud-based IT resources, and establishing cloud computing technology architectures based on Software-as-a Service (SaaS), Platform-as-a-Service (PaaS) and Infrastructure-as-a-Service (IaaS) delivery models.

For instructor-led delivery of this lab course, the Certified Cloud Trainer works closely with participants to ensure that all exercises are carried out completely and accurately. Attendees can voluntarily have exercises reviewed and graded as part of the class completion.
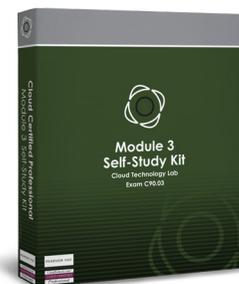

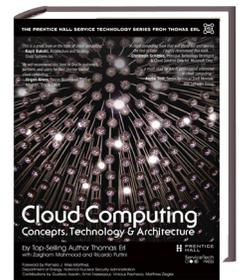

For individual completion of this course as part of the Module 3 Self-Study Kit, a number of supplements are provided to help participants carry out exercises with guidance and numerous resource references.

Duration: 1 Day

Cloud Computing: Concepts, Technology & Architecture Text Book

This CCP course module covers a range of in-depth topics that are described in the course booklet and further elaborated by detailed technical coverage and case study examples in the accompanying *Cloud Computing: Concepts, Technology & Architecture* text book from the acclaimed *Prentice Hall Service Technology Series from Thomas Erl*.

Self-Study Kit

The materials for this course module can be purchased separately as part of the Module 3 Self-Study Kit, which includes additional materials and study aids. These materials are designed to prepare you for Exam C90.03 and are also suitable for general remote, self-paced study purposes.
